DETAILED ACTION

Allowable Subject Matter

1. Claims 1-13 and 19-34 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or suggest a vessel filter portion comprising a first anchoring portion spaced axially from a first filtering portion and a second anchoring portion spaced axially from a second filtering portion, the first and second anchoring portions and the first and second filtering portions comprising at least one loop, and first and second converging section being adjacent opposing ends of the filter. This limitation, in combination with all of the limitations of claim 1, makes the claim allowable over the prior art.

The prior art of record fails to disclose or suggest a surgical apparatus comprising a vessel filter having first and second anchoring portions spaced axially from the intermediate portion, and wherein regions of the first and second anchoring portions extend radially distally in a first direction and bend back to extend proximally in a second direction. This limitation, in combination with all of the limitations of claim 9, makes the claim allowable over the prior art.

The prior art of record fails to disclose or suggest a surgical apparatus comprising a vessel filter having first and second portions, each portion having a looped anchoring portion that extends in the axial direction away from the filter portion, and the end region of each anchoring portion converges to form a converging section. This limitation, in combination with all of the limitations of claim 26, makes the claim allowable over the prior art.
